To Whom It May Concern,

FCC Mail Room

My name is David Parrish and I reside in the Coast Range Mountains in Oregon. The nearest town is twenty miles away and I live without electricity. I do have a landline telephone and I live here because of my disability. I have epilepsy, which is exacerbated by microwave emitting devices. I cannot live in areas with cellphone coverage or be exposed to wireless systems or computers. I am lucky to have found an isolated place where I feel well. For me to function adequately and deal with the social isolation I need a telephone. To live without one would cause me undue hardship. There are millions of people like myself who depend on landline phone service. I need the landline telephone infrastructure to be kept in place in order to carry out my life. Please do not dismantle the switched telephone network, or the Universal Service Fund, which helps me pay my phone bill.

Sincerely,

David Parrish

Re: David H. Parrish
DOB: July 3, 1962

To Whom It May Concern:

This patient is under my care for epilepsy. In addition he suffers from apparent sensitivity to electromagnetic radiation which could emanate from wireless communication devices or other complex electronic devices. Exposure leads to a risk of precipitating an epileptic seizure despite his treatment with medication. He should thus avoid any areas where these devices are being used, or the devices should be turned off in his presence.

Thank you for your assistance,

Richard Lafrance M.D.
